

Hi,

Just a quick note on behalf of Starline Windows and AkzoNobel Powder Coatings, to say thank you for your time on Thursday at the lunch and learn session. It was a pleasure presenting to you and thank you for all the great questions.

As I mentioned during the presentation, we have binders with a full set of brochures/color cards/sample panels available for your library. If you didn't get one and would like one, please let us know and we would be more than happy to send you one. We don't put every combination possible on the cards - there are just too many, so these cards just show some of the more popular colors and effects, but we can custom color match for you or add a texture or metallic look etc. As I mentioned, an architect recently called me to say he was looking for a black, fine textured, fine metallic and couldn't see anything like that on the cards. I checked with the labs that it was possible to create it in the technology he wanted, and we did it for him. He approved it and it will be used on the job. So please just ask if you don't see what you're looking for. We can't do everything, but I'll be happy to check out what's possible for you.

Also if you have any technical questions, or would like examples of powder specs, please just let me know and I'd be happy to send them to you.

Peter Kuschnir (pkuschnir@starlinewindows.com) would also be happy to send you any information that you require on **Starline Windows**.

Please just let any of us know if we can support you with any current or future projects you might be working on - that's what we are here for.

Thanks and Season's Greetings,

Fiona Levin-Smith
