

Understanding and Preventing Floor Covering Failure

Presented by Chris Maskell
National Floor Covering Association

The issues with floor covering installations are many, and can quickly lead to conflict on site, delays and expensive mistakes. Planning ahead is the only way to ensure acceptable site conditions are provided for proper floor covering installation. Presentation content will include common floor covering installation issues, sub-floor flatness, concrete dry times, moisture issues and testing requirements. Content will also include NFCA installation standards and the resources available for specification to help the entire construction team pre-plan to avoid these recurring problems.

Chris has worked in the floor covering industry for over 24 years. During this time, he has been a flooring contractor, manufacturer's representative and business owner. As CEO of the National Floor Covering Association (NFCA) he works with the Board of Directors to promote NFCA standards for commercial floor covering installations. He also operates the NFCA's Quality Assurance Program, a specifiable, third party inspection review service for commercial projects and is a certified floor inspector. Chris speaks at trade shows, travels to educate all construction parties and promotes the standards detailed in the NFCA Floor Covering Reference Manual.

This presentation is in collaboration with the AIBC Vancouver Island Chapter, and registered AIBC Members will receive 1 AIBC CES Core Learning Unit for attending.

- LOCATION:** Fireside Grill
4509 West Saanich Road, Victoria BC
