

## Why Become a CCCA?

### Certified Construction Contract Administrator

The CCCA designation is a testament to knowledge of recommended practices in organizing, implementing and supervising construction contract documents and in expertise in written communication.

Consultants, contractors and others are expected to administer the finer points of a construction contract for the facility owner. In order to do this efficiently, a contract administrator must have a complete understanding of all aspects of the construction process and its workings. The CCCA program provides that understanding.

The objective of the CCCA designation is to improve construction contract administration by providing education related to the understanding, administration and enforcement of conditions of the contract during the bidding and construction phases of a project.
